

1995 - 2004 Average Daily Traffic

How to Read the Maps

The average daily traffic (ADT, 24-hour, non-directional, seasonal adjusted traffic count) is at the approximate location at which the count was taken. The counts are coded so that the last digit reflects the year of the count. Example: 22,002 reads 22,000 ADT in year 2002.

Data Source

Traffic Counts reported on this map were collected from the following government agencies: ODOT, County Engineers, the City of Columbus, suburban communities, and their consultants. Counts are from 1995 - 2004 inclusively.

Index

Funding Source

This map prepared in cooperation with the U.S. Department of Transportation's Federal Highway Administration and Federal Transit Administration, the Ohio Department of Transportation and local communities.

Base Mapping Source

The base mapping used was provided by ODOT and all the County Auditor offices.
